Reaction :

Preferred Term	Severity	Report Description	Treatment
Epilepsy		had influenza vaccine on 9/4/08 am. She had a "black-out" late afternoon on the same day and 3 more on 10/4/08. She said she had fallen over onto her back each time and her back is sore. Follow-up 17/4/08: She had had 2 more ?black-outs? with falls on 11 & 12/4/08. A locum doctor visited her 12/4/08, said her blood pressure was fairly low (did not tell her the reading), and said she had internal bruising, but he thought her spine was all right. On 16/4/08 she had seen her GP who prescribed Brufen 400mg tid for her back pain. Her blood pressure was OK then. doctor did not think she needed further treatment or change of treatment for the ?blackouts?. She says she is still in a lot of pain	Brufen 400mg tid for back pain

Recovered

Information:

Reaction :

Preferred Term	Severity	Report Description	Treatment
Confusional state	Caused or prolonged inpatient hospitalisation	Report of drug induced confusion and drowsiness (thought to be gabapentin but carbamazepine and amitriptylline may have contributed also). He reported increased lethargy and somnolence and an episode of altered behaviour upon starting gabapentin (although pain had improved)	Gabpentin dose was decreased to 100mg/day. Carbamazepine was ceased. MS contin dose was decreased from 10mg nocte to 5mg nocte. Endone was also prescribed for breakthrough pain.
Abnormal behaviour	Caused or prolonged inpatient hospitalisation		
Lethargy	Caused or prolonged inpatient hospitalisation		
Somnolence	Caused or prolonged inpatient hospitalisation
