Preferred Term	Severity	Report Description	Treatment
Nausea		I am currently experiencing severe constipation despite eating fibre rich food etc. I also experience headaches over my left eye and still suffer from numbness around my left eye socket. I occasionally get the same tightness in my chest. I am now so loath to return to a doctor about these issues because of my experience late last year and early this year. Just last night I researched on the internet whether or not the Edronax could account for my range of symptoms and discovered that indeed it could! This is why I am now reporting all of them to this website. It's been over a year since I increased the dosage from 8mg to 12mg and it's been within that timeframe that I've experienced all of these symptoms.	treated each symptom
Chest pain			
Constipation			
Dizziness			
Headache			
Hypoaesthesia			
Hypotension			
Liver tenderness			
Lymphadenopathy

Laboratory Investigations :

Type	Range	Date Tested	Result	Details
Other data				Ordered blood tests and CT scans of chest, abdomen and pelvis, these all came back negative for a cancer recurrence. Was tested for TB and some types of infectious diseases. These were also negative.
Magnetic Resonance Imaging				MRI of brain to check that there was no recurrence of breast cancer and still every test all came negative.
